La Statione -

- where model railroads are a pure delight!

Different layouts present the history of the railroad and related enterprise from the beginning of the 20th century to modern times. The various displays, which cover about 1000 sqm, illustrate the development of the railroad and give the visitors an impression of each epoch's cultural and historical setting, its special technical features and typical architecture. The model builders have attached great importance to setting up a realistic timetable and adapting the speed of the individual trains. Of course, the model trains are representative of their age and operate, whenever technically possible, in their real length. There are about 220 engines in a scale of 1:87 (H0).

We offer more than model railroads

For the children there is a table full of fantastic wooden trainsets provided by the company BRIO where they can play. They can even create their own model with the help of the GEO-LINE-track-material, some switch plates and a trainset provided by ROCO.

Where model builders can meet in a nice atmosphere!

La Statione is a meeting place for everybody interested in model railroads. Just drop by for a chat with the two ladies who run our „Café Termini“ or have coffee and cake with your whole family. We serve home-made cakes, delicious snacks, sparkling white wine, original Italian cappuccino or espresso and good Bavarian beer. In our cafeteria nobody will die of hunger or thirst. And the best thing is: with every ticket you buy you get a 50 cent discount on the meals and drinks in the „Café Termini“.
